

WATER DEPT: Our water department projects are still going forward and we have Horne Excavation coming out soon to go over the ground work required. Our water usage has been very high and we have been using about 20,000 gpd from WW&L to keep up with demand. We are not telling customers they cannot water lawns but we would appreciate any help in conserving water. PLEASE BE SPARRING AND COSERVATIVE WHEN YOU ARE DOING THINGS OTHER THEN NORMAL HOUSE HOLD USAGE. We have gone from using 20,000 to 25,000 gpd to using 55,000 to 75,000 gpd total. Remember any questions and or concerns please contact the Mountain Lakes District Office.
