- Report from Harry Burgess (forester) who has been out to walk a good portion of the district owned lands and what he found
 - Majority of what he saw would be good candidate for chipping
 - Found a good potential landing spot on Valley Rd that looks like it had been used in the past
 - Recommends "fellow bunching" for logging practice, which is basically dropping whole trees, normally several at a time

- Timeline will fully depend on what we are looking to do as the landowners
